“Don't risk it, use the Biscuit”

Attention all Engineers, Builders, Plumbers, Drainers and Hydraulic Consultants! Did you know...

AS2870 requires the installation of Clay Plugs on all M, H1, H2 and E class sites.

“Where plumbing and drainage pass under the footing, there shall be a clay plug barrier to stop the ingress of water under the slab.”

Plastec's new Clay Biscuit will give you peace of mind that your installation meets all AS2870 requirements.
